LiDAR Garden

Measure Higher. Verify Faster.

LiDAR Garden delivers fully accredited verification of Remote Sensing Devices according to ISO/IEC 17025:2017 standards.

lidar-garden.com

The brand combines accredited verification with comprehensive technical support, providing customers with a fast, reliable, and efficient measurement process.

Verification	of ground based Remote Sensing Devices
Accredited	services performed according to IEC 61400-50-1 and IEC 61400-50-2
Direct	comparison of RSD with met mast reference-data
Validation	of proper operational performance of RSD system

Up to 231 m measurement height

PRECISION

Rapid installation Fast data processing and reporting

EFFICIENCY

End-to-end delivery from logistics to final report

FULL-SERVICE

Client Value

- Bankable, standards-compliant reporting
- Reduced measurement uncertainty
- Reliable data for investment, development and operational decision-making
- 360° of valid evaluations sector with strong and steady wind (near shore)
